HTML, CSS, JS	<div></div>
React.js	<div></div>
UI/UX and design	<div></div>
Dart, Flutter SDK	<div></div>
Research	<div></div>
Communication	<div></div>
Teamwork	<div></div>
Leadership	<div></div>
Adaptability	<div></div>
Problem Solving	<div></div>
Computer Skills	<div></div>
Java, Java EE	<div></div>

## LANGUAGE

- ✓ **Arabic: Mother tongue**
- ✓ **English: Full professional proficiency**

## PROFILE

Motivated and passionate fresh graduate with skills of commitment and communication.  
Fully committed to learning and gaining the best experience possible to develop further skills in the field of IT.  
Fluent in English with a positive attitude to help coordinate with colleagues on group projects or independently. With love for creating UI and learning about UI/UX.  
Great experience in Java with OOP. Good skills in HTML, CSS and JS, and fluent in Dart and the Flutter SDK. With many mini projects built with React.js

## EDUCATION

- **Bachelor's - Information Technology**  
Hashemite University, Zarqa | 2018 - 2022  
GPA of 3.26 (Very Good)
- **High School Diploma General Secondary**  
Al- Shaheed Zyoud High School| Zarqa | 2017 - 2018  
Scientific branch
- **SEP Summer Enrichment Program**  
King's Academy, Madaba | 2012 - 2014  
A summer training camp for 2-3 weeks, once a year, which helps developing English language skills and cultural knowledge.

## EXPERIENCE

- **ProgressSoft - internship** Amman | 2022 - 2022 (8 weeks)  
Intern (Java) - ECC Team
  - Worked with Java programming language in:
  - Re-creating data structures (fixed and dynamic Stacks) (Fixed and dynamic Queues).
  - Handling and parsing of CSV and JSON Files.
  - Coded a reconciliation system for CSV and JSON files and deployed it to the web using servlets and tomcat
  - Wrote and tested java code with JUnit framework.
  - QA/QC in the PS-ECCU (both ECC and ONUS) system.

## ACTIVITIES

### Cyber Jo Initiative

In 2021, in collaboration with Raseed 21 and the Hashemite University, the Cyber Jo initiative was launched. A cyber security centered initiative targeting the University's students and aims to raise awareness about cyber security and the potential threats that might harm our society.

### IEEE HU SB Event Coordinator

A former Officer for the IEEE Hashemite University's Student Branch: Evet/Workshop Coordinator during the 2020-2021 semesters.

## PROJECTS

### PORTFOLIO

a landing page-style introduction of me. Was practicing design and testing out CSS animations.  
you can visit it with the link below:  
<https://ajrchex.netlify.app/>

### DELICIOUS - RECIPE WEB APP

made with React.js, Delicious is a front-end only recipe web app  
hooked up with the free spoonacular API.  
React-React router-styled components-react icons

The site is live, visit it at:  
<https://lathethalicious.netlify.app/>

the project's source code can be found in the link below:  
<https://github.com/Abdullah-Rashed/Delicious>

### GITHUB REPO FINDER

A fully mobile responsive front-end application which allows users to compare user-selected repositories from Github with auto suggestion based on user input.  
React-momentjs-github search api-pure CSS

You can visit the website here:  
<https://ajrchex-repo-finder.netlify.app/>

the source code is available on Github:  
<https://github.com/Abdullah-Rashed/repo-finder>

### RANDOM USER GENERATOR

A random user generator using Vue.js

the source code can be found below:  
[https://drive.google.com/file/d/19H-Jqu\\_-MOZcCegmdLacCTMghGLbn7yT/view?usp=sharing](https://drive.google.com/file/d/19H-Jqu_-MOZcCegmdLacCTMghGLbn7yT/view?usp=sharing)

### TODO LIST - YOUTUBE CLONE (HTML CSS, JS)

A simple todo list to practice JS without using any front-end frameworks and with applying MVC design pattern.  
The second project is a youtube clone using only HTML & CSS  
with some consideration for responsive designs.

the project's repo can be found below:  
<https://github.com/Abdullah-Rashed/Web-Stuff>

## **GIGAPET - FLUTTER & FIREBASE**

[Hashemite University - Graduation Project Group | 2021](#)

A graduation project with a rating of (A) called "GigaPet", which is a mobile application that aims to be a platform for pet care services and to build a community for pet owners and veterinarian clinics to make pet care and adopting an easier process.

The project's presentation can be found below:

<https://1drv.ms/p/s!Aq04f0fWA9QZiD2Vq2mncGDewBPN?e=L1HWJO>

## **PHARMACY ONE SMART SYSTEM**

[Hashemite University - System Analysis Course | 2020](#)

A management system which handles the pharmacy's transactions through the mobile application and describes the process of transforming the traditional ways of buying medicine into an online automated experience.

The project's documentation can be found below:

<https://1drv.ms/b/s!Aq04f0fWA9QZgXzrph50b9MFce7L?e=ioUwCN>

## **CSV-JSON TRANSACTION FILES MINI-SYSTEM**

[Progressoft | 2022](#)

A mini system that checks for matching, mismatching and missing bank transactions in CSV and or JSON files using Java servlets

the source code can be found below:
